

BITCOINGAME WHITEPAPER 1.0

Bitcoin **GAME**

Integrating virtual currencies into virtual games.

Visit : www.bitcoingame.store

Abstract

Blockchain technology is developing in ways in which we never thought possible and that is clearly evident as we witness a true technological Renaissance. Since the dawning of Bitcoin, which ushered us into the age of legitimate digital currency solutions, we have experienced profoundly brilliant minds come together for the greater good and that is worth noting. From Smart contracts, to Artificial Intelligence, new advancements in science and business are being integrated into the blockchain and as a result, we have seen an explosive growth in the markets with massive global attention.

Broad adoption of blockchain technology has the potential of reshaping gaming industry and that is where **Bitcoin Game** comes into the people.

Cryptocurrencies are coming through as the new giant in the online gambling market, turning into the most common method of payment on gambling sites. Until recently, cryptocurrencies were not so widely accepted by major gambling sites, but slowly they are marching forward as one of the major accepted means.

Introduction

What are tokens?

Tokens are the digital asset investors buy from a company for money. It works as an accounting unit used to represent the digital balance in the business model of the project. Accounting for tokens is maintained in the database on the basis of blockchain technology and access to them is done through special applications using electronic signature schemes.

Problems in Online Gaming Industry

Security

Security is one of the paramount aspects that need to be kept in mind whenever there is people's money involved, especially when the stakes are so high. When players make deposits into a gaming account, which is controlled by a third party, there are often delays that come with this.

The deposits often take long to reflect or sometimes fail to reflect at all.

Slowness

The more there would be steps, the longer it would take to process the work. Same is with the conventional online betting system, because there is more number of steps involved, the processing time is significantly more. This is not so with the Bitcoin game system that deployed the blockchain technology through a smart contract with participants. Hence, there is little concern for intruders, because, it is almost impossible to hack the blockchain system that is deployed through smart contracts as compared to the traditional centralized authority. Alongside with **Poor Promotion services.**

Solutions

Trustless Betting

The transaction will become more transparent which will help the players to put their trust in the game like never before. This would mean that there

Would absolutely be no chances of Fraud, Risk or Corruption. Smart Contract help in making sure that the games are played fairly and the rewards and get transacted with speed.

Faster Transactions

The games associated with Bitcoin Game is powered with Smart contract technology which makes the transactions fast and precise.

Efficient Promotion

BGAME will offer online users a wide range of services such as appearance of customer's product on the site page allowing to attract more users.

All these payment will be made in BGAME coin.

- 6,000,000 Bitcoin Game set aside for development and operational fund.
- 2,000,000 Bitcoin Game will be reserved for bounties and airdrops.
- 3,000,000 Bitcoin Game will be allotted to the Founders and Advisors for their contributions. These tokens are will be locked for one year.

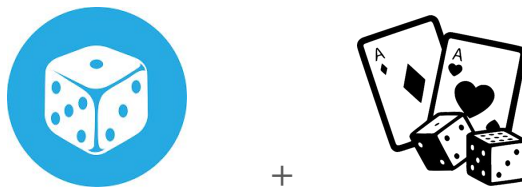

Our Games

“Games are widely used as educational tools, not just for pilots, soldiers and surgeons, but also in schools and businesses. Games require players to construct hypotheses, solve problems, develop strategies, and learn the rules of the in-game world through trial and error . Gamers must also be able to juggle several different tasks, evaluate risks and make quick decisions. Playing games is, thus, an ideal form of preparation for the workplace of the 21st century, as some forward-thinking firms are already starting to realize.”

CASINO

Internet gaming is a significant change from existing casino gaming services. It could be described as a discontinuous type of innovation. We will have various types of games with different limits for gamers with various Choice.

VIDEO POKER

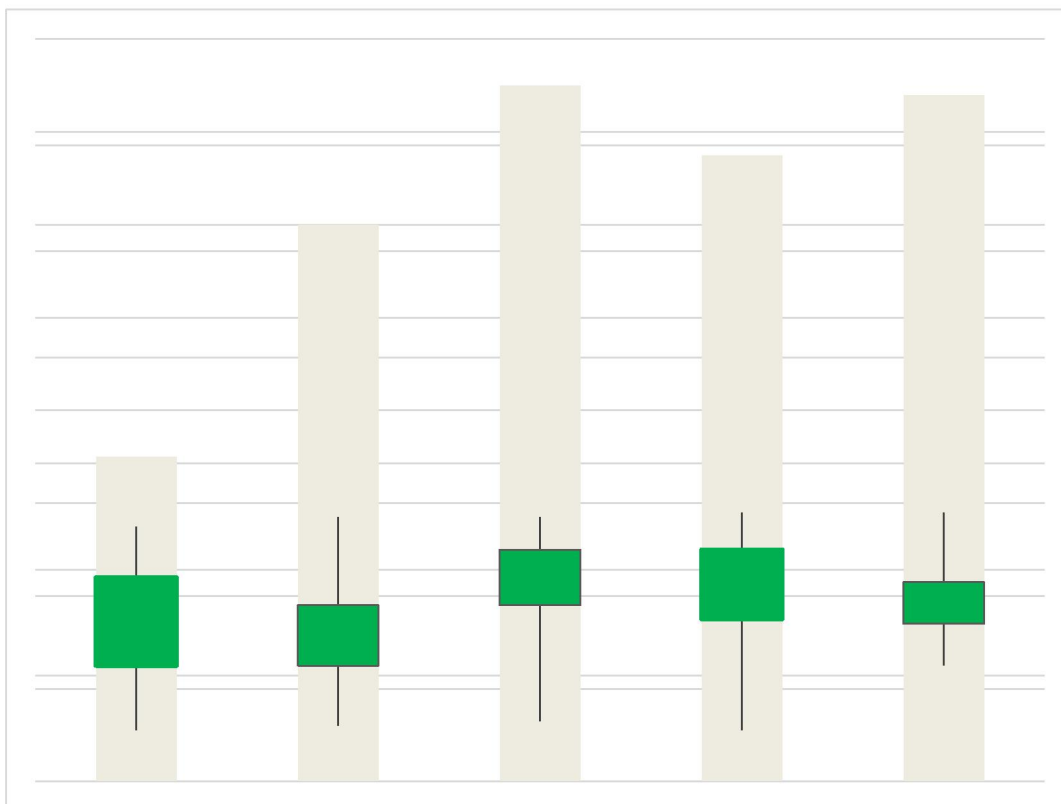

In video poker you are dealt five cards and choose which ones to hold and which ones to discard or 'burn'. Those you discard are replaced, and if you end up with a winning hand, you get paid out. Jacks or Better is the most widely known variation, but there are lots of different rules and win rates, with some of the most generous versions offering a theoretical return to the player of over 100%.

FACTS

- *The size of the global video game market will accrue to about USD 90.1 billion in 2020 from USD 78.6bn in 2017. This would imply an increase of approximately 14.6%.*
 - *By far, the largest gaming markets are located in China, the United States and Japan.*

Exchange listing and increase in Value.

After the private sale, online gamers interested in using Bitcoin Game platform will have to purchase our coin at the market price.

However, those who purchase BGAME during the private sale will benefit from appreciation in prices.

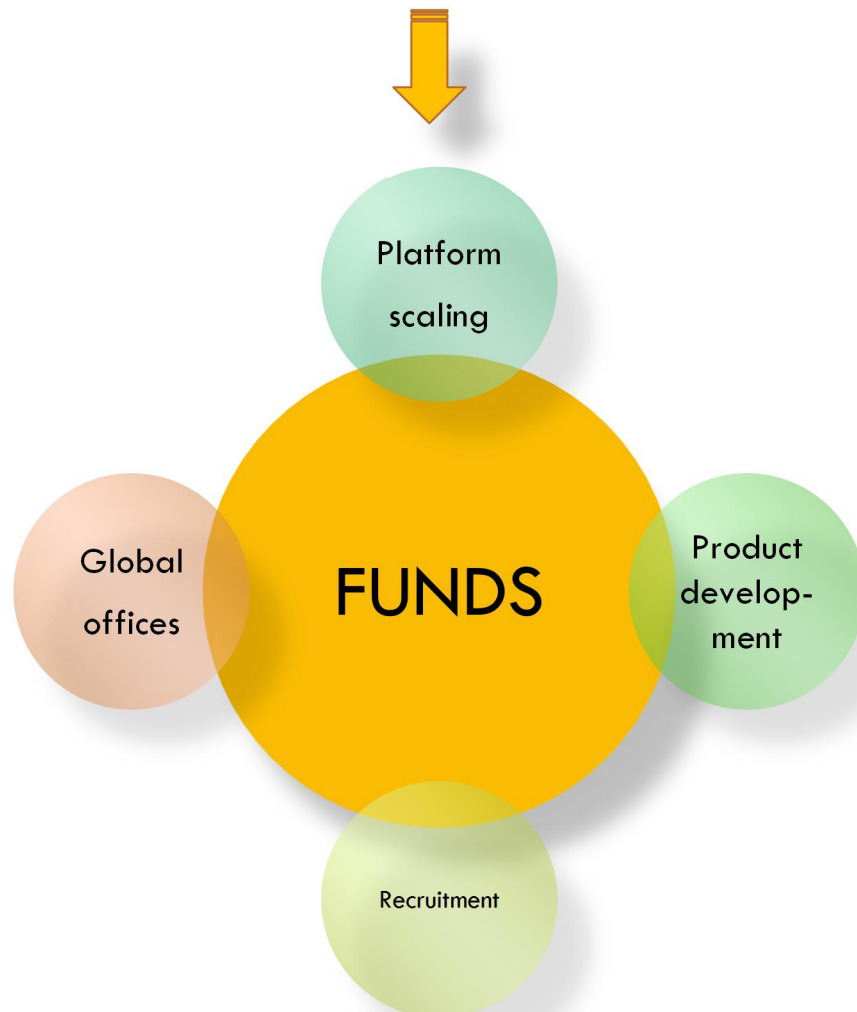

As more and more players and users come on the platform, the demand for BGAME will rise, and hence its price on exchanges will increase.

The price will keep increasing as there is more demand of the currency by existing and new players/users.

Use of Funds

How are the funds going to be allocated?
